

Introduction to Computer Science

14 June 2023

Examination Paper

Answer ALL questions.

Clearly cross out surplus answers.

Time: 2 hours

The maximum mark for this paper is 50.

Any reference material brought into the examination room must be handed to the invigilator before the start of the examination.

Question 1

a) Explain the difference between data and information.

3

State ONE (1) example. Data is a collection of facts, while information puts those facts into context.

b) State ONE (1) use of computer systems in the following organisations:

i) Hospital maintaining patient records

1

ii) Governments data processing

1

iii) Travel companies reservation system

1

c) Ameer buys a 4GB SD card for use as secondary storage in his phone.

i) Calculate how many megabytes there are in 4GB. 4000mb

1

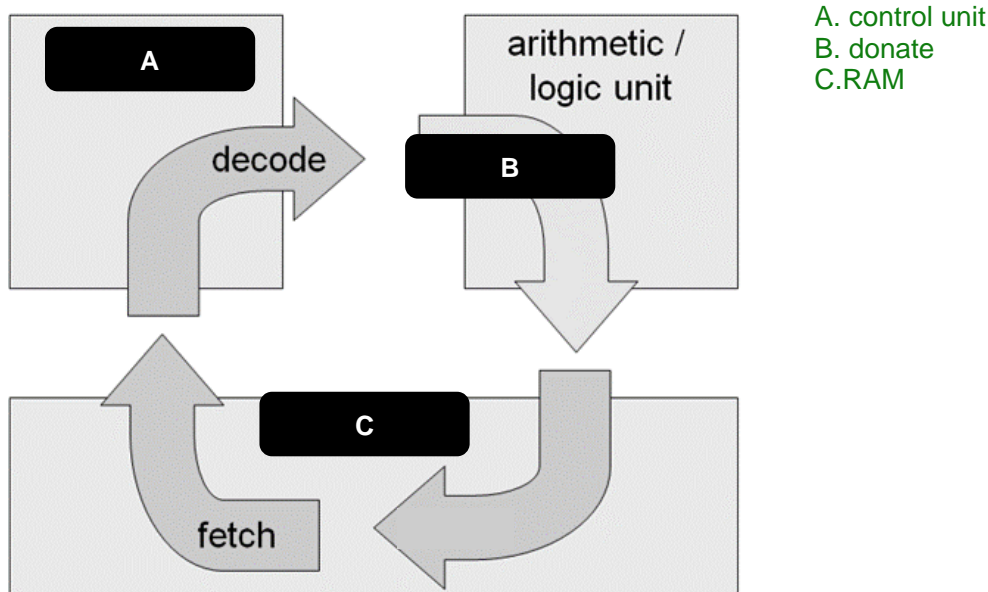

ii) An SD card is a type of solid state storage. Discuss the advantages of solid state storage compared to magnetic storage.
speed, portability, reliability, durability

3

Total 10 Marks

Question 2

a) The diagram below shows the cycle for a processor carrying out instructions. Some labels are missing.

Questions continue on the next page

	Marks
i) State the name missing at label A.	1
ii) State the name missing at label B.	1
iii) State the name missing at label C.	1
b) Complete the missing words describing the purpose of a clock in a processor.	
i) A computer's clock is found on a microchip that regulates the <u>timing and speed</u> of all the functions of a computer.	1
ii) Faster clock speeds result in more <u>operations</u> being performed in a set time.	1
iii) A clock's speed is measured in <u>hertz</u> .	1
c) Explain the term cache memory and why it is used.	-A small amount of memory which a part of CPU. 2
d) Explain the purpose of driver software.	-Temporarily stores frequently used instructions and data for quicker processing by the central processing unit of a computer. 2
-An interface to hardware and enables operating systems and hardware devices to communicate	
-Controls a hardware device	
Total 10 Marks	

Question 3

a) Hadi is an interior designer and has created a vector image map called <i>groundfloormap.ai</i> using Adobe Illustrator.	i) -A vector image is made up of paths, each of which has a mathematical formula or vector. 2
i) Describe the term " vector image ".	-The vector, using coordinates, indicates to the path how the each part of the image is shaped and what color it is bordered with or filled by
ii) -A vector image is enlarged (scaled), it doesn't lose resolution	ii) Describe the impact on the quality of her work if she enlarges the drawing. 1
iii) The file size of the map is 2.52 megabytes.	1
Convert this to kilobytes. <u>2520 kilobytes</u>	
iv) Lossless - As a file is compressed, the quality of a picture remains the same and does not deteriorate	iv) Hadi needs to send the work to her manager. The original file is too large to send using her regular email provider. 2
	Describe TWO (2) methods Hadi could use to ensure her work can be sent to her manager. Lossy
	-Lossy compression produces a much smaller compressed image file
b) 5F (5F) * 16 = (5*16^1)+ (%*16^0) =(5*16)+(15*1) =80+15 +95	b) Convert the hexadecimal number 5F to a decimal number. Show your working. 2
	c) Convert the decimal number 78 to hexadecimal. Show your working. 2
	c) 4E calculate pya pr.
Total 10 Marks	

Questions continue on the next page

Q4.b) Network layer – facilitates addressing and routing of data
 Data link layer – deals with digital representation of data, for example, signals that enter and leave network cables
 Physical layer – transmits binary data from one computer to another.

Marks

Question 4

- a) State TWO (2) types of wireless transmission, other than Bluetooth. Wi-Fi, 3G 4G **2**
- b) The OSI Reference Model divides network communications into SEVEN (7) layers. **6**
 Each layer performs specific functions when transmitting data across a network.
 Describe any THREE (3) of these layers.
- c) Draw a diagram showing FOUR (4) computers connected in a network using a mesh topology. **2**

Total 10 Marks

Question 5

- a) The UK Copyright, Designs and Patents Act aims to protect various types of work from being copied. **2**
 Identify TWO (2) types of work that are protected by the UK Copyright, Designs and Patents Act. Sound recordings and broadcasts
- b) Discuss ONE (1) environmental issue with the increasing global ownership of mobile phones. **2**
- c) A logic circuit contains the following logic:

$$P = (A \text{ AND } B) \text{ OR } (\text{NOT } C)$$
 i) Draw a logic gate diagram that shows the relationship between A, B, C and P. **4**
 ii) State the value of P if:
 • A, B and C all have the initial value of 1 **1**

You **must** show your working.

- iii) State the value of C if: **1**
 • A and B both have the initial value of 0
 • P has the output 0

You **must** show your working.
